## EXPERIENCE

- **RikkeiSoft**                                                        Ha Noi, VN
  *Software Engineer*                                              *5/2019 - Present*
  - **Team leader**:
    - Provide solutions to the requirements from customers. Clear requirement
    - Develop functions, Fix bugs
    - Planning, esimate task
    - Support member, review code
    - Manage the progress of the task
  - **Development**:
    - Clear requirement
    - Develop functions, Fix bugs

## PROJECTS

- **E-commerce**:
  - **Project description:** Collaborated on the maintenance and development of various E-commerce websites, as well as the creation of new websites based on customer requirements. Implemented features and functionality to enhance the user experience and streamline online shopping processes.
  - **Client:** Korea
  - **Team size:** 4
  - **Responsibilities:** Development
  - **Programming Language:** Python, Javascript
  - **Framework:** Nestjs, Nextjs
  - **Platform, server and database:** Postgresql, MongoDB, Graphql

- **Eging App**:
  - **Project description:** Synthesize and analyzing data available to project area, date, time have many ink. Create a monthly cron job to get data from another database. Data analysis provides a method of statistical prediction of squid population Use vue to display the analyzed data
  - **Client:** Japan
  - **Team size:** 2
  - **Responsibilities:** Team leader
  - **Programming Language:** PHP, Javascript
  - **Framework:** Laravel, Reactjs
  - **Platform, server and database:** Mysql

- **CANBUS**:
  - **Project description:** Developing and maintaining an application that allows users to create customized tools according to their needs, with a focus on safety and diversity of features. The application is widely used by large companies and is built on a platform similar to low-code.
  - **Client:** Japan
  - **Team size:** 30
  - **Responsibilities:** Team leader
  - **Programming Language:** Java, Javascript
  - **Framework:** Spring Core, Ractive, Nodejs

- **Platform, server and database:** Linux, MongoDB

- **CVG**:
  - **Project description:** I worked on a large-scale web application project for a Vietnamese company that involved multiple provinces. To accommodate the scale of the project, we used a microservices architecture. Each website was distributed to its corresponding province, and there was also a central website. The complexity arose from synchronizing and transferring data between stores in different provinces.
  - **Client:** Viet Nam
  - **Team size:** 30
  - **Responsibilities:** Team leader
  - **Programming Language:** PHP, Java, Javascript
  - **Framework:** Laravel, Vuejs, Spring
  - **Platform, server and database:** Linux, Mysql

- **Car Rental**:
  - **Project description:** Car rental management and tenants. Car rental registration function through 3 steps: Register information, Car rental with price, car pictures
  - **Client:** Japan
  - **Team size:** 20
  - **Responsibilities:** Development
  - **Programming Language:** PHP, Javascript
  - **Framework:** Laravel, Reactjs, ReactNative
  - **Platform, server and database:** Mysql

- **Food Delivery**:
  - **Project description:** Shopping cart and delivery on google. Build the application interface, use google map integrated into the application, handle the shopping cart part (LINK)
  - **Client:** VietNam
  - **Team size:** 4
  - **Responsibilities:** Development
  - **Programming Language:** PHP, Javascript
  - **Framework:** Laravel, ReactNative
  - **Platform, server and database:** Mysql

## EDUCATION

- **Codegym Viet Nam**                                                Ha Noi, VN
  *CGC-Bootcamp PHP*                                              *1/2019 – 5/2019*
